

Cisco Flexible Payment Solutions

from Tech Data

Payment options for businesses of all sizes

Tech Data is here to help your customers reimagine their workforce and workplace. As business of all sizes, across all verticals are being redefined by the changes of today and the uncertainties of tomorrow, business recovery has never been more important. With flexible payment solutions, you can ease your customers' purchase decision and help them manage their cash flow while you get paid upfront.

Cisco easylease

With Cisco **easylease**, you give your customers a way to spread the payment of their projects in 36 predictable instalments over 3 years and make your deals more profitable. Bundle all Cisco solutions into one payment plan, including hardware, software, services and third-party technology. Available for projects starting at as low as \$1000.

Cisco Open Pay

Cisco Open Pay provides your customers consumption-based financing enabling them to pay for routing, switching, compute and storage technology as they use it. It is a cloud-like pricing and offers flexibility where you can purchase on a per terabyte, per server, per port and per virtual machine basis.

Cisco Security Enterprise Agreement 0%

License enterprise security software, upgrades, and support subscription services in one multi-year agreement that expires at the same time.

Assignment of Receivables

You can offer your customers an extended fixed payment solution and assign all payments to Cisco, receiving an upfront cash payment that allows you to preserve your cash for other initiatives and investments.
